

For the first time in its history, Stanford University is offering some of its most popular engineering classes free of charge to students and educators around the world! Stanford Engineering Everywhere (SEE) expands the Stanford experience to students and educators online. A computer and an Internet connection is all you need to view lecture videos, access reading lists and other course handouts, take quizzes and tests, and communicate with other SEE students.

This fall, SEE launches its programming by offering one of Stanford's most popular sequences: the three-course Introduction to Computer Science taken by the majority of Stanford's undergraduates and seven more advanced courses in artificial intelligence and electrical engineering.

Stanford Engineering Everywhere offers:

- Anytime and anywhere access to complete lecture videos via streaming or downloaded media.
- Full course materials including syllabi, handouts, homework, and exams.
- Online social networking with fellow SEE students.
- Support for PCs, Macs and mobile computing devices.

Stanford encourages fellow educators to use Stanford Engineering course materials in their own classrooms. A Creative Commons license allows for free and open use, reuse, adaptation and redistribution of Stanford Engineering Everywhere material.

To access the the courses, go to:
